**Subject:** RE: Walking Through New York's Proposed Final Phase III WIP Planning Targets

Hi Rich,

We took a look at the question list you provided and had two more questions to add:

- 1) Can you explain how the 9.5% change in E3 for the stormwater model correction (as shown in the spreadsheet Lucinda sent this morning) translates to the 250,000 pounds of additional nitrogen?
- 2) Can you subtract the reductions expected from Phase II WIP from the 2.02 million nitrogen /0.034 million phosphorus updated remaining reductions?

Thanks!

**Lauren A. Townley**

Ken/Lauren-

Attached please find a two page outline of our intended New York Phase III WIP Planning Targets briefing paper which will walk you through New York's proposed final Phase III WIP planning targets. Lucinda and I have our teams working on answering the bulleted list of questions and provide you both and, ultimately, Jim Tierney with a much better understand of these numbers. We should have a complete briefing paper sent to you by this coming Friday as we discussed during our last call two weeks ago.

Ruth and I would like to schedule two follow up phone calls for next week to first walk both of you and then Jim Tierney through the final briefing paper and help you all reach a much better understanding of all these numbers and what's influencing what. Here's the dates and times the Ruth, Jeff Gratz, Javier Laureano and I are available next week:

7/2 – After 12PM

7/3 – 2-2:30 PM, 4:30-5PM

7/5 – 8:30-9:30 AM, 11AM – 1PM, 3-5PM

7/6 - 8:30AM – 5PM

Can you please let us know if we can schedule our call with you both on Monday afternoon and then our collective call with Jim Tierney on that Tuesday, Thursday or Friday.

Apologies for cutting so close to the July 9<sup>th</sup> Principals' Staff Committee meeting, but we have been working with a host of jurisdictional partners to address questions and run scenarios and analyses.

Thanks, Rich

Rich Batiuk
